SAMPLE WORK · BUSINESS REQUIREMENTS DOCUMENT

# Membership Renewal Automation

Business requirements for replacing the manual, spreadsheet-based membership renewal process with a CRM-triggered, automated renewal and payment flow.

Organisation **Hopkinsdale Health (fictional)** Version **1.0 Draft** Author **G M Shariful, Business Analyst**

## 1. Document control

| VERSION | DATE | CHANGE | STATUS |
|---|---|---|---|
| 0.1 | Week 1 | Discovery notes and as-is process map | Superseded |
| 0.5 | Week 3 | Requirements drafted after stakeholder workshops | Superseded |
| 1.0 | Week 4 | Walkthrough feedback incorporated, ready for sign-off | For approval |

## 2. Purpose and background

Hopkinsdale Health renews several hundred member organisations each year. Renewals are currently managed by exporting member lists to Excel, emailing notices one by one, matching payments by hand and chasing late payers by phone. The process is slow, error-prone and gives managers no live view of renewal status.

This document defines what the business needs from an automated renewal solution. It does not prescribe the technical design.

## 3. Objectives

- **Reduce manual effort:** remove repetitive export, email and matching tasks from the membership team.
- **Shorten the renewal cycle:** move from weeks to days between notice and confirmed payment.
- **Single source of truth:** renewal status held in the CRM, not in spreadsheets.
- **Visibility:** managers can see renewals due, paid and at risk at any time.

## 4. Scope

### In scope

- Renewal notices triggered from CRM due dates
- Online payment link in each notice
- Automatic payment reconciliation to finance
- Automated reminders for unpaid renewals
- Renewal status reporting for managers

### Out of scope

- New member onboarding
- Changes to membership pricing
- Replacement of the finance system
- Historical data clean-up beyond the current year

## 5. Stakeholders

| STAKEHOLDER | ROLE IN THIS CHANGE | INTEREST |
|---|---|---|
| Membership Manager | Business owner, approves requirements | Faster renewals, less chasing |
| Membership Officers | Daily users of the renewal process | Fewer manual steps, clear status |
| Finance Team | Receives and reconciles payments | Accurate, automatic matching |
| Account Managers | Own member relationships | Early warning of at-risk renewals |
| IT / CRM Team | Build and support the solution | Clear, testable requirements |

## 6. Current state and future state

### As-is (manual)

Export list to Excel › Email notices one by one › Invoice or bank transfer › Match payments manually › Chase by phone

### To-be (automated)

CRM due date triggers flow › Personalised notice with pay link › Member pays online › Payment reconciles automatically › Auto reminders, CRM updated

## 7. Business requirements

| ID | REQUIREMENT | PRIORITY | ACCEPTANCE CRITERIA |
|---|---|---|---|
| BR-01 | The system shall send a renewal notice automatically 60 days before each member's renewal date. | MUST | Notice is sent on the correct day for 100% of active members in UAT. |
| BR-02 | Each notice shall include the member's name, renewal amount and a secure online payment link. | MUST | Test notices show correct details for each membership tier. |
| BR-03 | Payments made online shall be matched to the member record without manual entry. | MUST | Paid renewals show as "Paid" in the CRM within one business day. |
| BR-04 | Unpaid renewals shall trigger reminders at 30, 14 and 7 days before the due date. | SHOULD | Reminders stop as soon as payment is recorded. |
| BR-05 | Account managers shall be notified when a high-value renewal is overdue. | SHOULD | Notification reaches the assigned account manager on the first overdue day. |
| BR-06 | Managers shall see a live view of renewals due, paid, overdue and at risk. | MUST | Dashboard totals match CRM records in UAT. |
| BR-07 | Members shall be able to update their invoice contact from the notice. | COULD | Updated contact is saved to the CRM record. |

## 8. Non-functional requirements

| ID | CATEGORY | REQUIREMENT |
|---|---|---|
| NFR-01 | Security | Payment details are handled only by the approved payment provider and never stored in the CRM. |
| NFR-02 | Privacy | Member data is managed in line with the organisation's privacy and records management policies. |
| NFR-03 | Accessibility | Notices and payment pages meet WCAG 2.1 AA. |
| NFR-04 | Auditability | Every notice, reminder and payment status change is logged against the member record. |

## 9. Assumptions, constraints and risks

### Assumptions

- Renewal dates in the CRM are accurate for current members.
- The payment provider supports automatic reconciliation.
- Members have a valid email contact on file.

### Risks and mitigations

- **Data quality:** incorrect due dates. *Clean-up sprint before go-live.*
- **Adoption:** staff revert to spreadsheets. *Training and a short parallel run.*
- **Member experience:** too many reminders. *Reminders stop on payment.*

## 10. Requirements traceability (extract)

| REQUIREMENT | OBJECTIVE | USER STORY | TEST CASE |
|---|---|---|---|
| BR-01 | Reduce manual effort | US-04 Auto renewal notice | TC-11, TC-12 |
| BR-03 | Single source of truth | US-07 Auto reconciliation | TC-18 |
| BR-06 | Visibility | US-10 Renewal dashboard | TC-24, TC-25 |

## 11. Approval

| NAME | ROLE | DECISION | DATE |
|---|---|---|---|
| | Membership Manager (business owner) | | |
| | Finance Manager | | |
| | CRM Product Owner | | |
